AT A GLANCE

A total of **107 953** people Tested for HIV: 79 572 **females** and 28 381 **males**

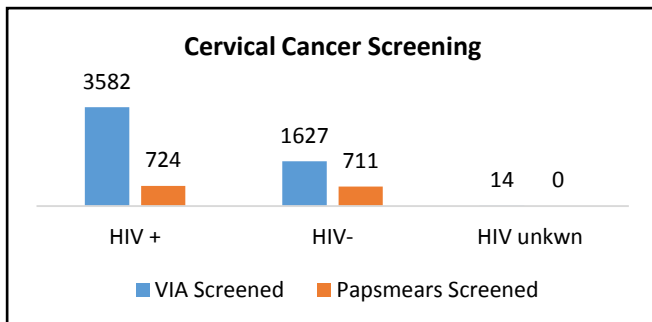

93% Successfully linked to care

2 313 Patients newly started on ART

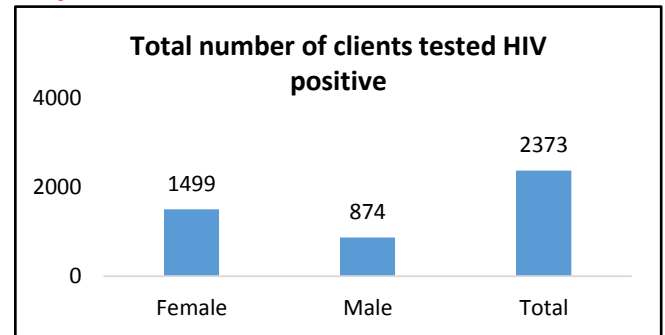

1 614 patients were newly initiated on ART and TPT.

TB Screening for Quarter One **90%**

Namibia currently has **186, 330**

HIV+ patients on treatment

HIV Testing Yield- 2.2 %

Males - 3.1 %

Females – 2.2%

5 418 Voluntary Medical Male Circumcisions done

PREFACE

The Response Monitoring and Evaluation (RME) subdivision, falls under the Expanded National AIDS Response Coordination Division of the Directorate of Special Programmes (DSP) within the Ministry of Health and Social Services. The RME subdivision has three main roles that includes (1) supporting the Directorate of Special Programmes in providing guidance and coordination of routine data collection activities of the Health Sector Response Division (HSRD). (2) Shepherding of research and evaluation activities related to the HSRD. (3) Coordination of the HIV and AIDS multi-sectoral monitoring and evaluation activities as part of the UNAIDS “Three Ones Principles” which calls for countries to have One National AIDS Authority, One Coordination and one Monitoring and Evaluation Framework.

This bulletin is part of an agreed requirement outlined in various documents as a deliverable of the Response Monitoring and Evaluation Subdivision. One such document is the National Strategic Framework for HIV and AIDS Response in Namibia 2017/18 to 2021/22 which is a necessary and critical feature of Namibia’s HIV and AIDS Response. This effort aims to highlight the good practices, challenges and plans being conducted by the subdivision. Additionally, it is a tool that is aimed at informing stakeholders on critical information for various uses, including planning and implementation of HIV/AIDS response.

Data needs vary for different audiences and therefore exhibiting the progress of implementation of various programmes can never be sufficient. The expectation of this bulletin focuses on the data and progress done for quarter one which runs from April to June of the 2021/22 financial year.

Data systems in many parts of the world faces challenges of human resources constraints at all levels, limited infrastructures, and unavailability of data collection instruments. These general challenges among others also affect the quality of data produced by the subdivision. The RME is continuously engaging various key players to seek and implement ways aimed at improving the data quality. Beside these challenges, the confidence in the data produced remains high and useful. In addition, the country has completed the roll out of the Electronic Patient Monitoring System (ePMS) and the Multi Sectoral Information Management System (MIMS)s’ District Health Information System (DHIS2) to various stakeholders. Furthermore, there is ongoing development of Index Contact Testing and the HIV self-testing databases.

Despite the ongoing COVID-19 pandemic, RME has continued to meet its reporting obligations. The Directorate extends gratitude to all relevant stakeholders for their continuous support and engagement, as well as to encourage the general public to utilize the information contained in this document.

The RME will include more data variables from other programmes areas and continue the production of this bulletin on a quarterly basis.

LIST OF ABBREVIATIONS

ART - Antiretroviral Therapy
CECAP - Cervical Cancer Prevention
CxCa - Cervical Cancer
DAPP - Development Aid from People to People
DHIS2 - District Health Information System
DSP - Directorate of Special Programmes
ePMS - Electronic Patient Monitoring System
HIV - Human Immunodeficiency Virus
HTS - HIV Testing Service
LLETZ – Large Loop Excision of the Transformation Zone
NAMAF – Namibia Association of Medical Aid Funds
MHSS - Ministry of Health and Social Services
MIMS - Multi-Sectoral Information Management System
PrEP - Pre-Exposure Prophylaxis
TPT - TB Preventative Therapy
VIA – Visual Inspection with Acetic Acid
VMMC - Voluntary Medical Male Circumcision
WBCG - Walvis Bay Corridor Group

INTRODUCTION

The data in this bulletin is collected from Ministry of Health and Social Services (MHSS) health facilities except for the data under Multi-Sectoral Information Management System (MIMS) which is from programmes implemented outside MHSS.

This bulletin covers programme areas of HIV testing, Antiretroviral Therapy (ART), Voluntary Medical Male Circumcision (VMMC), Cervical Cancer and MIMS data for quarter one (April - June) of the financial year 2021/22.

ONGOING ACTIVITIES

Quantum Electronic Patient Monitoring System (ePMS) Upgrade

The Ministry of Health and Social Services remains committed to provide continuous Quantum ePMS upgrade in order to ensure that the ART patient management and reporting needs are met.

Indicators in DHIS2

The subdivision is currently working on the ART, Cervical Cancer Prevention (CECAP), HIV Testing Service (HTS) and the Pre-Exposure Prophylaxis (PrEP) indicators to be part of the Core-Aggregate instance on DHIS2.

HIV TESTING

TOTAL TESTED FOR HIV

Figure 1: Total Number of Clients Tested for HIV by sex in MHSS Health Facilities in Namibia, April to June 2021

Figure 2: Number of Clients Tested for HIV by Age Group and Sex in Namibia, April to June 2021

Figure 3: Number of Clients Tested for HIV by Region and Sex in MHSS Health Facilities in Namibia, April to June 2021

Figure 4: Quarterly Trend of Clients Tested for HIV in MHSS Health Facilities in Namibia by Sex from April 2020 to June 2021

Figure 5: Number of Clients Tested for HIV by Sex and Period of Last HIV Test, in MHSS Health Facilities in Namibia, April to June 2021

TOTAL TESTING HIV POSITIVE

Figure 6: Number of Clients Tested Positive for HIV in MHSS Health Facilities in Namibia, April to June 2021

Figure 7: Number of Clients Tested Positive for HIV by Age and Sex in MHSS Health Facilities in Namibia, April to June 2021

Figure 8: Number of Clients Tested Positive for HIV by Region and Sex in MHSS Health Facilities in Namibia, April to June 2021

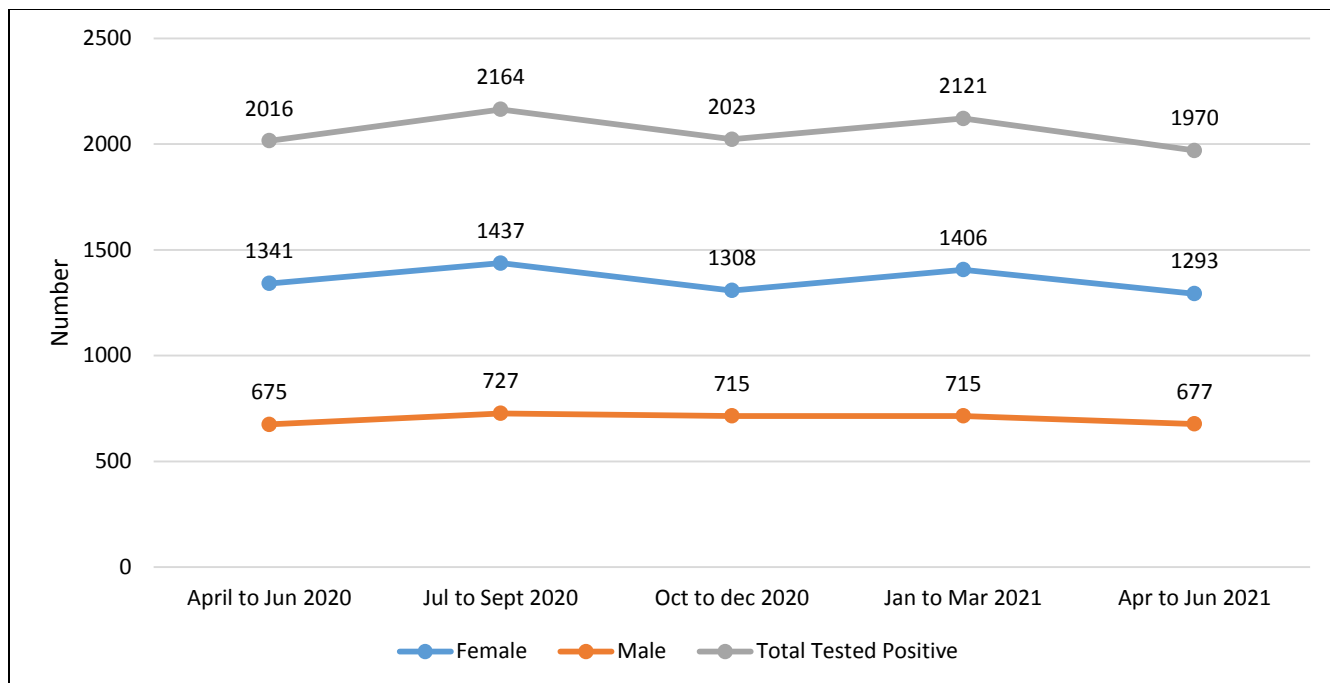

Figure 9: Quarterly Trend of Clients Tested HIV Positive by Sex from October 2019 to JUN 2021

POSITIVITY YIELD

Figure 10: Positivity yield by Sex in MHSS Health Facilities in Namibia, April to June 2021

Figure 11: Positivity Yield by Age and Sex in MHSS Health Facilities in Namibia, April to June 2021

Figure 12: Positivity Yield by Region and Sex in MHSS Health Facilities in Namibia, April to June 2021

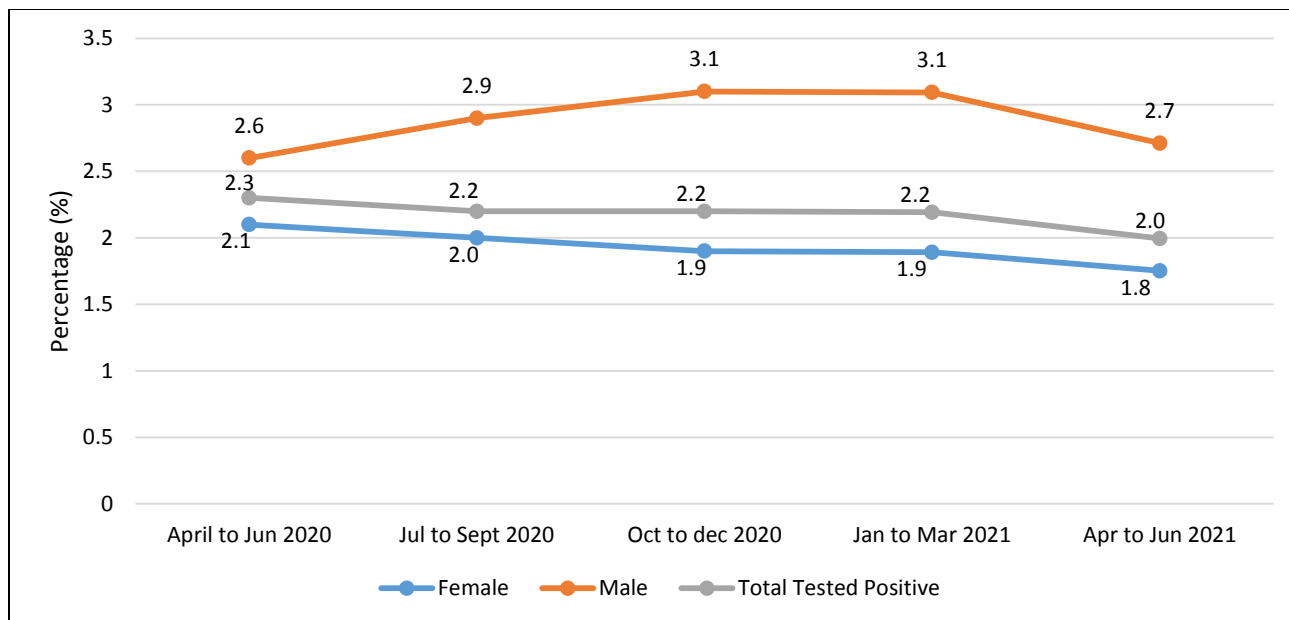

Figure 13: Quarterly Trend for Positivity Yield in MHSS Health Facilities from April 2020 to June 2021

LINKAGE TO CARE

Linkage to care is calculated from determining the number of clients with an antiretroviral therapy (ART) registration number (unique ART number) out of the clients that tested positive for HIV.

Figure 14: Percentage of Clients Tested HIV Positive and Linked to Care by Sex in MHSS Health Facilities in Namibia, April to June 2021

Figure 15: Percentage of Clients Tested HIV Positive and Linked to Care by Age Group and Sex in MHSS Health Facilities in Namibia, April to June 2021

Figure 16: Percentage of Clients Tested HIV Positive and Linked to Care by Region and Sex in MHSS Health Facilities in Namibia, April to June 2021

Figure 17: Quarterly Trend of Clients Tested HIV Positive and Linked to Care in MHSS Health Facilities in Namibia, April 2020 to June 2021

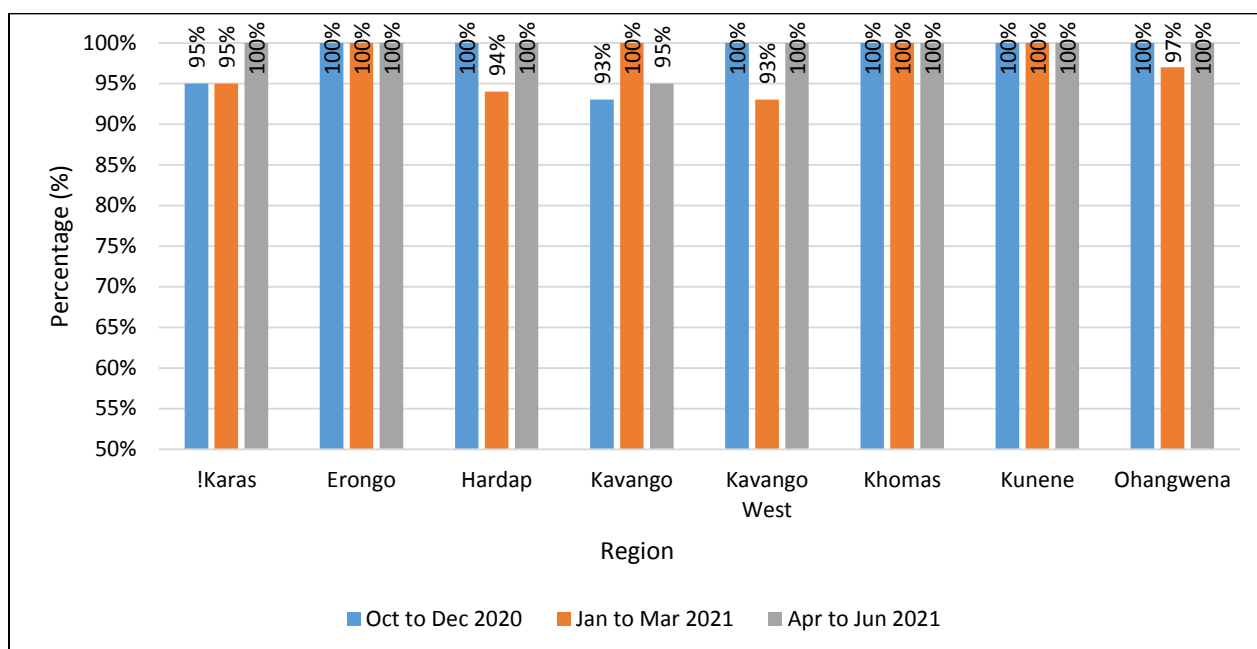

Figure 18: Quarterly Trends for Reporting Rate by Region and Quarter, in MHSS Health Facilities in Namibia, October 2020 to June 2021 (Part 1)

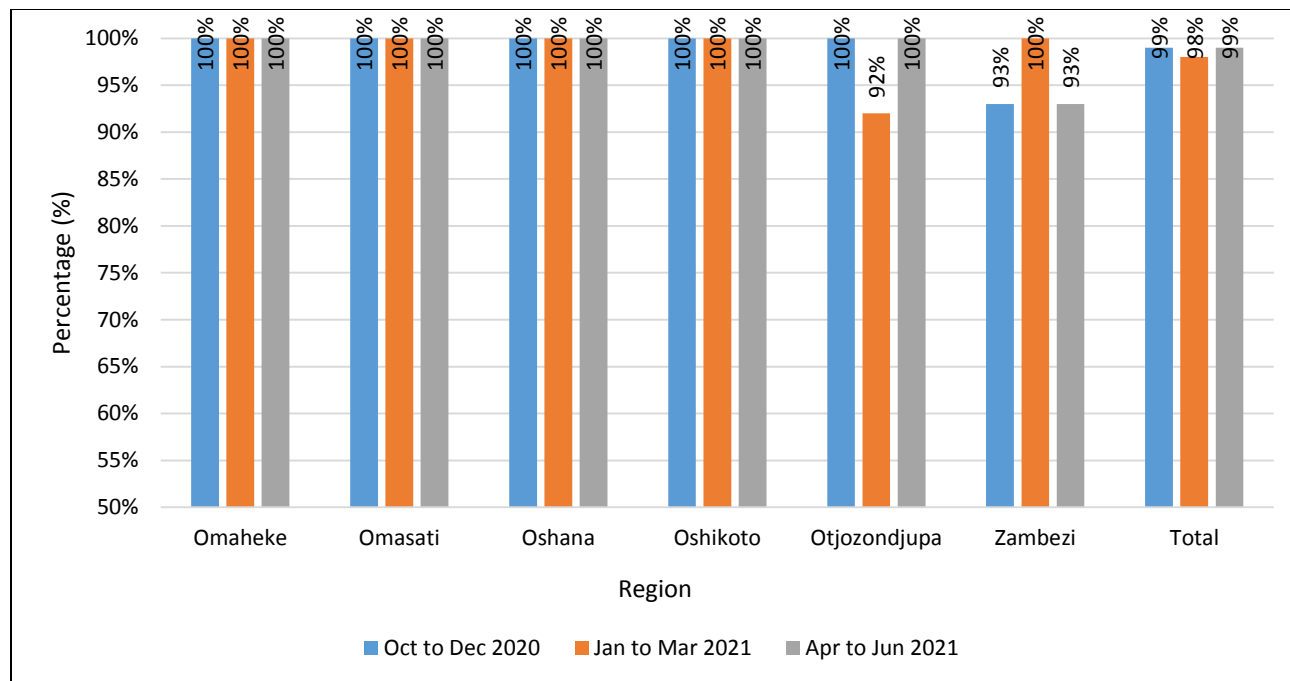

Figure 19: Quarterly Trends for Reporting Rate by Region and Quarter, in MHSS Health Facilities in Namibia, April to June 2021 (Part 2)

ANTI-RETROVIRAL THERAPY (ART)

PATIENTS NEWLY STARTED ON ART

Figure 20: Total Number of Patients Newly Started on ART in MHSS Health Facilities in Namibia, April to June 2021

Figure 21: Number of Patients Newly Started on ART by Age Group and Sex in MHSS Health Facilities in Namibia, April to June 2021

Figure 22: Number of Patients Newly Started on ART by Region and Sex in MHSS Health Facilities in Namibia, April to June 2021

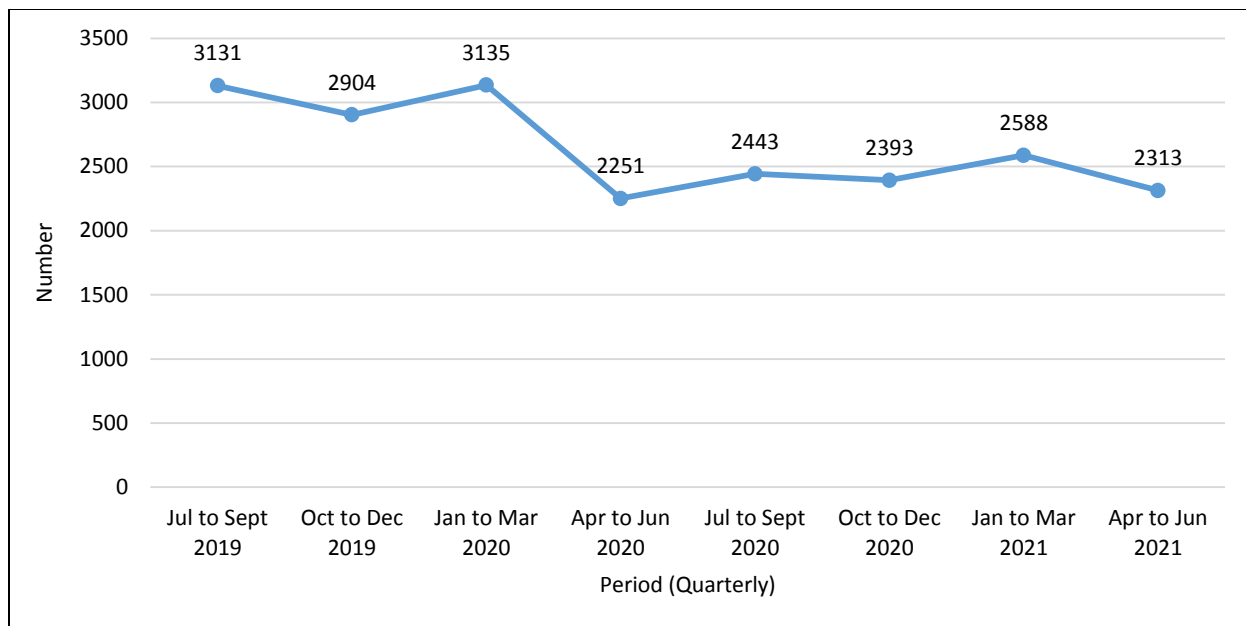

Figure 23: Quarterly Trend of Patients Newly Started on ART in MHSS Health Facilities in Namibia, July 2019 to June 2021

PATIENTS CURRENTLY ON ART

Figure 24: Total Number of Patients Currently on ART by Sex in MHSS Health Facilities in Namibia, April to June 2021

Figure 25: Number of Patients Currently on ART by Age and Sex in MHSS Health Facilities in Namibia, April to June 2021

Figure 26: Number of Patients Currently on ART by Region and Sex in MHSS Health Facilities in Namibia, April to June 2021

Figure 27: Quarterly Trend of Patients Currently on ART in MHSS Health Facilities in Namibia, July 2019 to June 2021

TB PREVENTATIVE THERAPY (TPT)

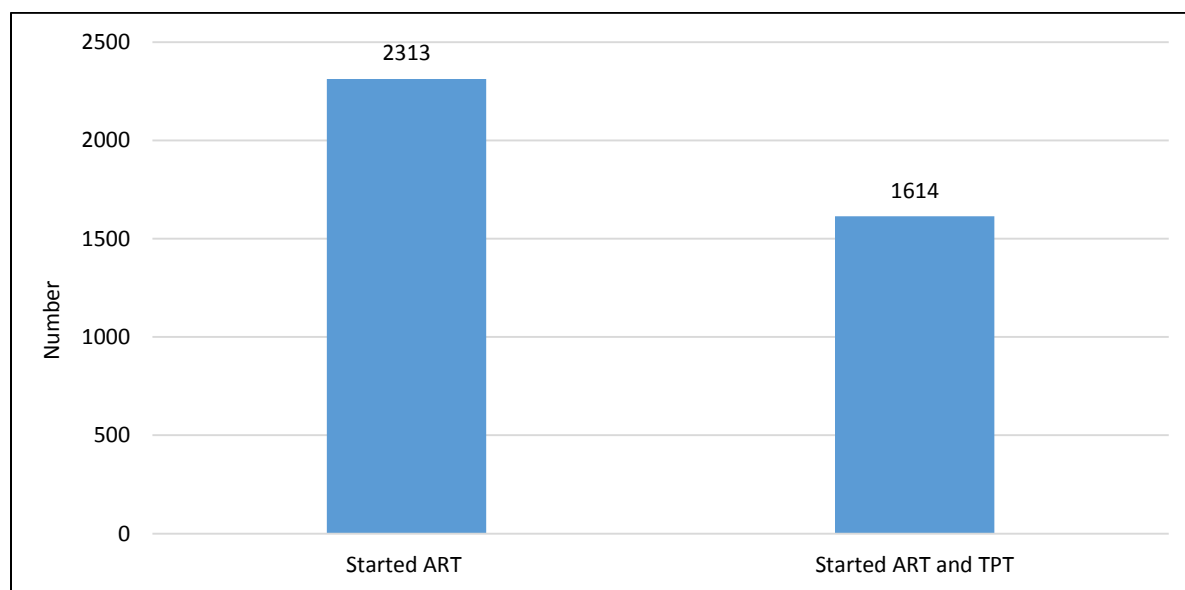

Figure 28: Number of Patients Newly Started on ART and Among Those Started ART, Number that Started TPT in MHSS Health Facilities in Namibia, April to June 2021

TB SCREENING

Figure 31: Number of patients on ART who Visited the MHSS Health Facilities and Number Screened for TB During the Quarter (April to June 2021) by Region in Namibia

PATIENTS REPORTED TO HAVE DIED WHILE ON ART

Figure 32: Number of patients Reported to Have Died While on ART by Sex in MHSS Health Facilities in Namibia, April to June 2021

Figure 33: Number of Patients Reported to Have Died While on ART by Age Group and Sex in MHSS Health Facilities in Namibia, April to June 2021

Figure 34: Number of Patients Reported to Have Died While on ART by Region and Sex in MHSS Health Facilities in Namibia, April to June 2021

Figure 35: Quarterly Trend of Patients Who Were Reported to Have Died While on ART in Namibia, July 2019 to June 2021

VIRAL LOAD

Viral load suppression was defined as results of tests showing viral load of <1000 copies/mL.

Figure 36: Number of patients with Viral Load Done and Viral load Suppressed in MHSS Health Facilities in Namibia, April to June 2021

Figure 37: Number of Patients with Viral Load Done by Age Group and Sex in MHSS Health Facilities in Namibia, April to June 2021

Figure 38: Viral Load Suppression rate by Age and Sex in MHSS Health Facilities in Namibia, April to June 2021
